Projects

Back-End Projects (Skills used: Java, OOPS, MySQL)

Pizza Ordering (Layered Architecture)

- Description: This Pizza Ordering application simplifies the process of taking orders, updating existing orders, viewing order details, and deleting orders, ensuring smooth management of customer requests.

Student Entry Management (Layered Architecture)

- Description: Effortlessly manage student information with this layered architecture project. Easily add, update, view, and remove student records through a clear separation of user interface, data access, and service layers.

Employee Application (JDBC)

- Description: Enhance employee management with this JDBC-driven application, utilizing MySQL for robust database functionality. Seamlessly handle tasks like adding, updating, viewing, and removing employee records, ensuring efficient database connectivity and management.

Front-End Projects (Skills used: HTML, CSS, Javascript)

Portfolio (<https://madhuvan143.github.io/Portfolio/>)

- Description: Introduce myself effectively with this portfolio crafted using HTML, CSS, and JavaScript. Seamlessly showcase my projects, skills, and achievements with a user-friendly interface, demonstrating proficiency in front-end web development.

KFC Landing Page,

Microsoft Homepage Clone

Javascript Mini Projects

Task Management (to-do list) (<https://github.com/Madhuvan143>)

- Description: Boost productivity with this dynamic to-do list powered by JavaScript. Seamlessly manage tasks, prioritize activities, and track progress with an interactive user interface, showcasing proficiency in JavaScript for front-end web development.
